

Invacare | **Action³ Junior**

COMPATIBLE

A wheelchair that grows with the child

*Invacare **Action³ Junior** is a lightweight, foldable paediatric wheelchair designed for children aged between 3 and 15 years. **Action³ Junior** has been developed to match the individual needs of the child and can grow as they grow. Because a child's needs will change the **Action³ Junior** offers a large range of options to accompany the child in their development and to provide the necessary clinical support. The **Action³ Junior** comes in attractive, modern styles, designed to appeal to kids.*

JUNIOR

Yes, you can.[®]

Grow with Invacare Action³ Junior

As children grow and develop, a key feature of a children's wheelchair is that it can be adjusted to accommodate the child's individual growth and needs. With the **Invacare Action³ Junior**, the width of the seat and backrest can be adjusted, as can the height of the arm and footrests.

An individual fit with extensive size combinations

When choosing a paediatric wheelchair, a key factor is ensuring a perfect and comfortable fit for the child. The **Action³ Junior** comes in one of the most extensive ranges of size combinations with seat width from 205 to 380 mm, offering the right fit for all children, from toddlers to teenagers.

Customize your chair!

A wide range of options is available on the **Action³ Junior** to meet every child need in term of comfort and positioning. In addition the child can customize his

wheelchair and appropriate it thanks to the wide range of frame colours, spoke guards and other options.

Features and Options

Seat-width adjustment
The seat width of the chassis can be adjusted with an innovative telescopic crossbar over 4 seat positions from 205 to 380 mm.

Upholstery adjustment
As the chassis is made wider, so the upholstery on the back and on the seat of the chair can be made wider with Velcro flaps.

Table tray
In addition to the standard slide-on table tray, we offer a swing-away tray which can easily be folded away.

Adjustable seat height and balance
For improved driving performance and different height options, the rear wheel can be mounted in 20 different positions.

Features and Options

Front stabilizer kit

A front stabilizer kit is available to increase forward stability for active children who are likely to climb all over the wheelchair and be especially energetic when propelling the wheelchair.

Hangers

① 90° hanger, ② 80° hanger and ③ elevating legrest adjustable from 0° to 80° are available.

Ergonomic Stroller push handles

The push handles can be adapted to all kinds of backrests and are adjustable in a variety of ways. A width-adjustable back brace can be added (or used on its own) to make the backrest more rigid. It can also be utilized as a headrest support, ensuring greater user comfort.

Spoke guard

Four different types of spoke guards are offered to match the different wheelchair colours and tastes. (#4 = transparent)

Armrests

Removable and height adjustable desk ① and junior ② armrests as well as skirt- ③ and mudguards ④ are available.

Ankle grips

Our ankle grips are available in 3 sizes. They adjust to position the feet and can also aid children who are prone to spasms.

Transit Version

We also provide a transit version, with a seat height of 460 mm and 12" plastic rear wheels.

Front wheel assortment

3 different types of front wheels are available: ① 5" x 1" flashing solid tyre, ② 5" x 1 3/4" solid tyre and ③ 5" x 1" solid tyre.

Abduction legrest position

A 30° abduction position is possible with 90° hangers.

Cushion

A 50 mm bi-density foam cushion is available and follow depth adjustment of the seat upholstery.
