

INVACARE MEDLEY ERGO LOW SELECT

The Medley Ergo Low from Invacare perfectly balances of economy, functionality and quality. The optimised length of the various mattress platform sections provides increased comfort for clients when sitting up in bed. It also reduces shear and friction when the bed sections are being adjusted and prevents clients sliding downwards. The Medley Ergo Low offers all the same benefits as the Medley Ergo, but boasts extra-low height levels, thus maximising safety for individuals at risk of falling out of bed.

The Medley Ergo range boast of several mattress platform sections that offers improved comfort for clients, reduces shear and friction when the bed sections are being adjusted and prevents clients sliding downwards.

STANDARD BED
SUPPLIED WITH STYLISH

FOOTBOARDS

CONTACT US

EASY HANDLING

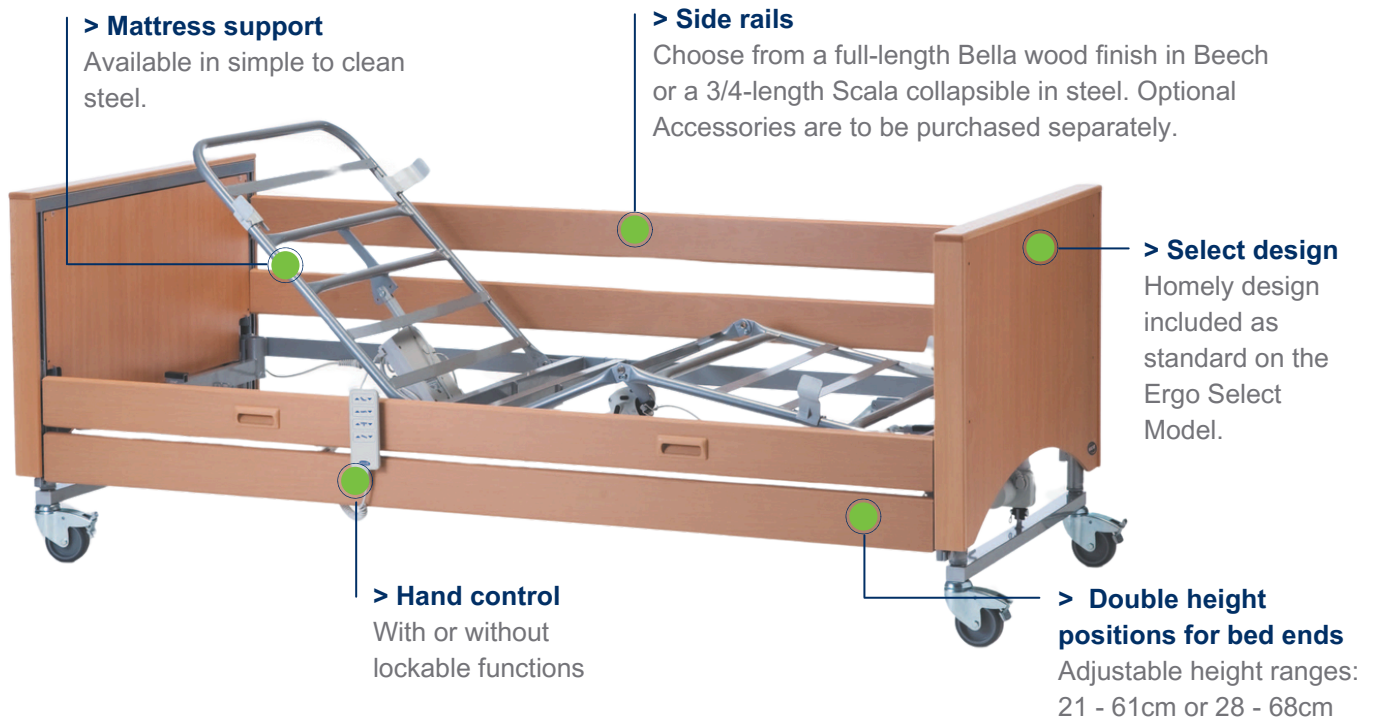

An optional transportation fitting is available so that the bed can easily be collapsed, moved and re-installed in a variety of locations.

COMFORT

In all resting and sitting positions, the profiling of the bed and optimised mattress base assists minimising the risk of patients slipping downwards.

SUPPORT

Easy repositioning of the client with hand controls that help with independence and support the caregiver. Available with or without lockable functions.

Designed to care for the client and caregiver

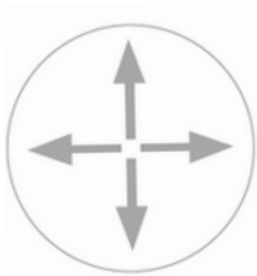

Our Medley Ergo range of beds is an easy-to-handle solution that assists in delivering client care and comfort.

Designed for client independence in varying needs. Built-in features and functionalities ensure the client and caregiver can operate the bed easily. Optimised dimensions of the mattress platform help to reduce shear and friction and in combination with pressure care mattresses, can provide optimal pressure care management.

CONTACT US

Helping to deliver optimal client care

A combination of advanced functionalities, sleek features and uncompromised quality for patient care.

SHEAR AND FRICTION REDUCTION

Optimised dimensions of the mattress base help reduce shear and friction and increase comfort, in line with anthropometrical measurements and pressure mapping.

EASY TO STORE & TRANSPORT

Tool-free assembly/disassembly in combination with our optional accessory transport fitting allows quick transportation and storage when the bed is collapsed and placed on the dedicated transporter.

QUALITY ASSURANCE

The Medley Ergo bed complies with the Safety Standard IEC 60601-2-52. The bed offers optimal quality, helping to deliver reliable long-term support for clients at home or in long-term care environments.
