Nimble Storage System

Nimble Storage System

It's all about flexibility, where you are in control of the size and set up that works best for you.

The Nimble Storage System has been designed to combine high density storage with strong and durable shelving. With the need for more efficient supply methods within healthcare facilities, space is limited and therefore more innovative solutions are required. Our system allows you to optimise your supply chain within your facility by providing a highly customisable storage solution.

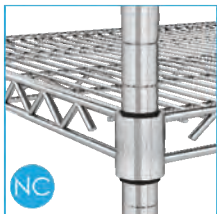

We have essentially taken the best of both worlds, from wire shelving and modular basket storage and combined them. The modular design of the Nimble System allows for easy integration with unlimited options to suit your needs.

Strength: Using marine grade 304 Stainless steel or Nickel Chrome wire shelves and posts.

Flexibility: Ability to create a fit for purpose solution in any environment.

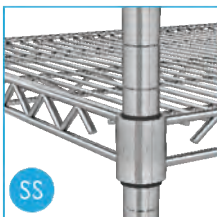

Functionality: Maximise your storage capacity with easy to customise solutions

Nimble Wire Shelving Options

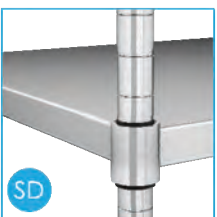

Nickel Chrome (NC)

NC is an affordable solution that functions well in most areas of the hospital environments. Nickel and chrome are bonded to the steel to give a great finish which is strong and durable.

Stainless Steel (SS)

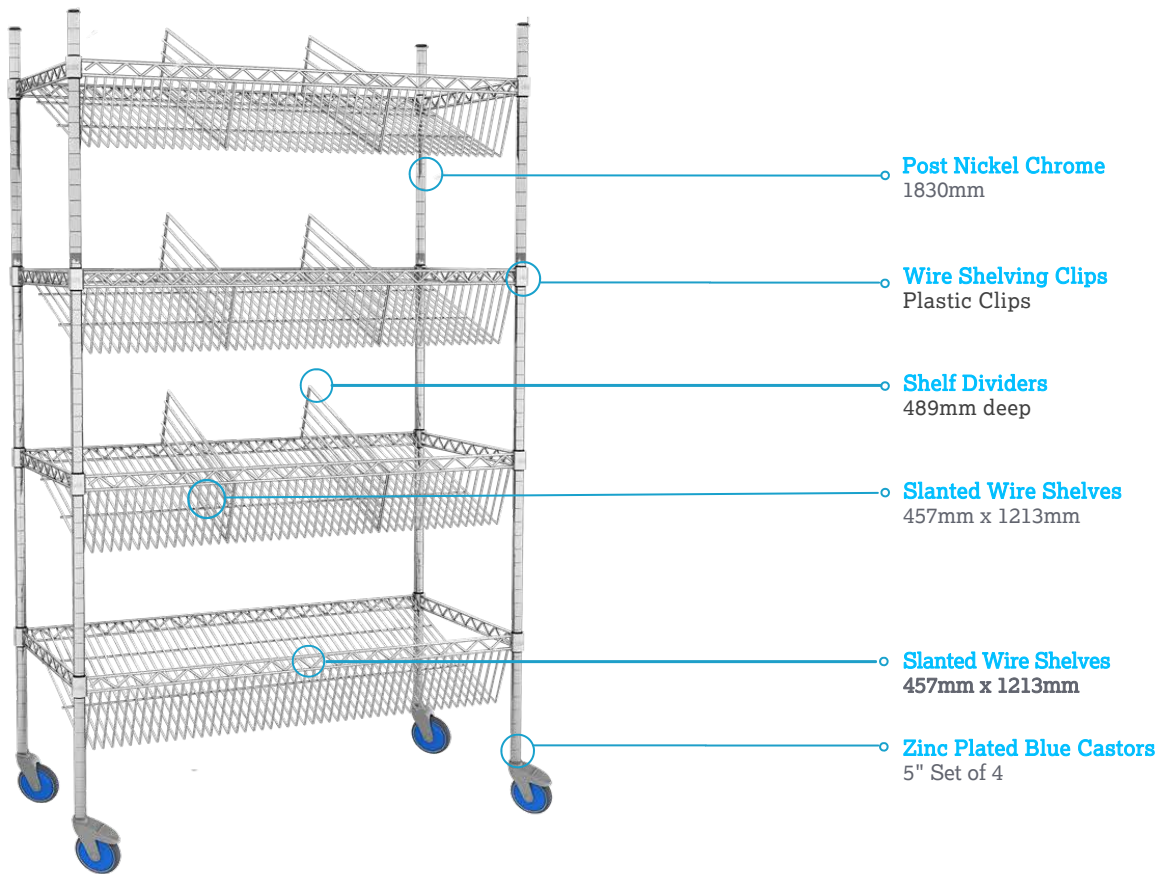

SS wire shelving can be used throughout any environment. Made from a high grade 304 SS which is suitable for all areas of the hospital- including wet environments.

Solid Stainless Steel (SD)

SD shelving has unlimited applications. SD can be used for storage, trolley or table tops. The smooth surface is easy to clean and made from 304 grade SS.

Customised and built to suit your storage needs...

Flexible solutions for maximising storage!

Nimble Compactors

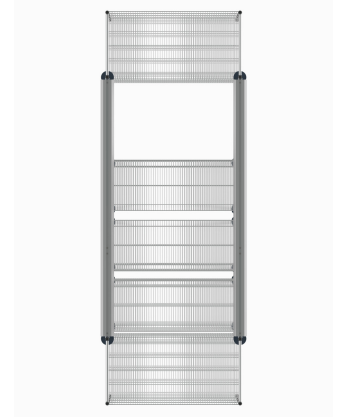

Hospital and Healthcare facility compactor storage system.

Nimble compactor system provides a great storage experience for healthcare facilities.

Flexible and modular solutions are here...

The Top-Track high-density system can increase storage capacity by 30 to 50%. A movable, open aisle allows full access to each shelving unit, thus eliminating hard to reach or "dead" spaces. The overhead track system guides the mobile units and opens an access aisle between any two units whenever it is needed.

Featuring the Nimble wire shelving that you know and love, with the additional Metro Top-Track system - we can create a compactor unit that is space saving, maximising your storeroom capacity and looks good too!

Top Track System

Nimble Wire Baskets & Wall Panels

Not all wire baskets are made equal...

Designed using fine mesh to ensure even small items can be stored, the Nimble wire baskets also include reinforced bars for extra strength, a clever lever system and a stacker that maximises space. The Nimble wire baskets come in a range of sizes and are perfect for use with wire shelving systems as well as wall mount applications in nickel chrome and stainless steel.

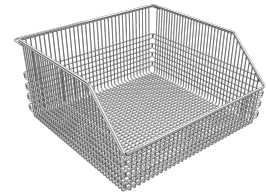

Small Wire Basket
100L x 195D x 87mmH

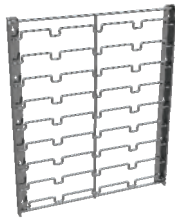

Medium Wire Basket
205L x 195D x 87mmH

Large Wire Basket
415L x 295D x 147mmH

Extra Large Wire Basket
415L x 395D x 207mmH

Wire Wall Panel

The wall panels have been designed to allow each unit to sit flush against each other so you can connect as many panels together as you like.

Divider

No more bent or hard to remove dividers. Ours have been designed to be easily added and removed to baskets with a simple lever system.

Stacker

Nimble's stackable baskets eliminate wasted space by storing baskets on top of each other, on a desk, workstation, or shelving.
