Helping To Care

... turn a nurse call socket into a cordless multiport

2544 & 2549 Cordless Multiport Expanders

Take a single nurse call socket and turn it into a cordless multiport. Allows up to five* cordless devices to output alarms directly into a nurse call system.

- Easy, rapid & low cost, user friendly setup requires no cabling or specialist programming.
- Staff add / remove paired products easily.
- Silent operation.
- Plugs directly into most nurse call systems.
- Accommodates a wired nurse call button.
- Nurse Call Pendant unplugged alarm.
- *Works with up to 5 cordless devices. (2 pads / mats & 3 other transmitters eg PET).
- The 2544 can work with a corded pad or mat.
- Low battery & pad lost alerts.
- Power by 3 x AAA batteries and / or 6 Vdc plug pack for zero downtime operation and none of the recharging hassles as experienced with similar devices sold by competitors.

What is the difference between the 2544 & 2549?

The 2544 plugs directly into a standard nurse call socket & has a RJ10 socket on the bottom so it can accept a corded premium pad or mat.

The 2549 is for a congested or hard to reach nurse call panel. It is installed on a bracket away from the nurse call panel using a curly cord.

WHAT'S IN THE BOX?
